DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-22 are rejected under 35 USC §103(a) over Cimecioglu et al. in view of Smith or Jaschinski. This rejection is set forth in the prior Office action paper number 5.

Response to Arguments

3. Applicant's arguments filed on January 17, 2003 have been fully considered but they are not persuasive.

Applicants argue that the combination of the reference is improper, because Smith and Jaschinski teach a different product. This is not convincing because what the secondary references teach is that cellulose fibers can be aldehyde oxidized, albeit using other process(es), and that the product, i.e., the aldehyde oxidized cellulose fibers, can be used in absorbent products. One of ordinary skill in the art would have reasonable expectation of success if the fibers taught by Cimecioglu et al. are used in absorbent structures, since both Smith and Jaschinski teach that aldehyde oxidized fibers can be used in absorbent structures. The examiner is not combining the

Art Unit: 1731

references of Smith or Jaschinski to obtain a product, but the teaching that aldehyde oxidized fibers can be used in absorbent products. The Examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would be motivated to make the proposed combination of primary and secondary references. In re Nomiya, 184 USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is what the combination of disclosures taken as a whole would suggest to one of ordinary skill in the art. In re McLaughlin, 170 USPQ 209 (CCPA 1971).

References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. In re Bozek, 163 USPQ 545 (CCPA) 1969. In this case, it is very clear from the teachings of the secondary references that the fibers taught by Cimecioglu et al. can be used in fluffed, absorbent structures, see above.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1731

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
